PROJECTS

Interactive Website (www.tanishqsolanki.com) (2020)

- An interactive website made using pure HTML, CSS and Javascript which was inspired by Robby Leonardi where users can scroll or use arrow keys to interact with the web page.

MediClock(2020)(In progress)

- Currently working on a full stack native app which would help people to keep a track of the medicines they consume on a daily basis. Using NativeScript with typescript (frontend) and Spring Boot (backend) and mySql(database)

VerbalMaster (2020)

- A Web application which will help people learn difficult words using mnemonics. Created using Angular 6 and hosted using firebase.

RULE ENGINE (2019)

- A portal that consists of pre-defined rules that have to be implemented for making an NDO specific microservice. Using ReactJS, angular 6 and redux, MxGraph and java.

GRE MNEMONICS APP (2019)

- An app that aims to help GRE aspirants in learning words through mnemonics. Technologies used - NativeScript and SQL Database. Soon to be deployed on Playstore.

FINAL YEAR PROJECT- Intelligent Audio Streaming Portal (2018)

- An audio streaming portal that focused on fast streaming and buffering. It also had features like voting and generating playlist according to the votes.
